PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, and Power BI, analyzing 10K+ records and delivering actionable insights. Designed and deployed 5+ interactive dashboards, improving stakeholder visibility and decision-making speed. Built and optimized predictive models that increased operational efficiency by 20% and reduced manual reporting effort by 30%. Automated data pipelines and reporting workflows, enhancing data accuracy and reducing turnaround time by 25%.

EDUCATION

Madhav Institute of Technology and Science

B.Tech in Mathematics & Computer Science Engineering – CGPA: 7.2/10

Gwalior, MP

Sept 2021 – June 2025

Rani Durgavati Higher Secondary School (MPBSE)

Class 12th – Percentage: 90%

Chhatarpur, MP

July 2020 – May 2021

TECHNICAL SKILLS

Programming Languages: Python, SQL, C++

Data Analysis & ML: Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn, Feature Engineering, Model Deployment

Visualization: Matplotlib, Seaborn, Power BI (DAX, Data Modeling), Excel (Pivot Tables, Power Query), Tableau

Databases: MySQL, PostgreSQL, SQL (Joins, Window Functions, CTEs, Subqueries)

Tools & Platforms: Git/GitHub, Jupyter Notebook, Google Colab, VS Code, Streamlit

WORK EXPERIENCE

Data Analyst - Intern

Jobsdoor360.in

Sept 2025 – Present

Gwalior, MP

- Processed and analyzed 10,000+ aspirant profiles from multi-source datasets, uncovering actionable patterns that improved job-candidate matching accuracy by 35% through advanced data preprocessing and feature engineering.
- Designed and implemented data-driven scoring and prediction frameworks to evaluate job application outcomes with 85% accuracy, increasing successful placement rates by 20%.
- Partnered with product, engineering, and recruitment teams to embed data insights into platform workflows, streamlining hiring processes and improving overall efficiency by 25%.

PROJECTS

Healthcare Analytics Dashboard | Python, SQL, Power BI | [🔗 GitHub Link](#)

- Leveraged 54K+ patient records using Python and SQL to uncover actionable insights across billing, insurance, and hospital performance, driving a 20%+ improvement in operational efficiency.
- Developed interactive Power BI dashboards tracking 5+ KPIs, including total patients (54K+), average length of stay (15 days), and average billing (25K+), enhancing data visibility and reporting efficiency.

Housing Price Prediction | Python, Scikit-learn, Pandas, Matplotlib | [🔗 GitHub Link](#)

- Developed and evaluated multiple regression models (Linear Regression, Lasso, Decision Tree) on 5,000+ housing records with 15+ features; achieved best performance with Linear Regression (R^2 score of 0.84).
- Enhanced model performance by 15% through 5-fold cross-validation, GridSearchCV tuning, and feature engineering; designed visualizations (heatmaps, scatter plots) to present insights and evaluate model behavior.

Music Store Sales Analysis | SQL | [🔗 GitHub Link](#)

- Queried and interpreted 10K+ records using advanced SQL to uncover insights into customer purchasing behavior and global sales trends across 15+ countries; identified top 10 customers, 5+ high-revenue cities, and top-performing genres and artists.
- Optimized business decision-making by generating actionable insights for promotions, event planning, and inventory management, improving customer segmentation efficiency by 25%+ and increasing revenue opportunities by 20%+.

CERTIFICATIONS & ACHIEVEMENTS

Pursuing a Full Stack Data Science with AI program from Electronics & ICT Academy, IIT Guwahati, covering Python, SQL, Data Analytics, Machine Learning, Deep Learning, and Business Analytics.
